-
- To include, click
 - To include an image or other file, just drag or paste it into the message field.. Go Transitions, choose one transition, and click the Play button on the preview window to check the effect.

The good news is that your computer, whether Mac or Windows, probably already has a useful program built in to keep your photo collections organized.. Or click and choose a recipient If they're in your Contacts app, Messages finds them as you type.. If you aren't a professional photographer and you don't do much to your photos besides boost the color and fix red-eye, then you really won't need more than the following basic programs..

- Choose Tapback from the menu
- Click a Tapback to add it to the message bubble..
- Review all of the photos and files that were exchanged in the conversation
- Add a group name, add members to a group, or leave a group.

In the image above, the heart next to "See you then!" is a Tapback Here's how to do it:

- Control-click a message bubble to open a shortcut menu..
- Use FaceTime to start an audio call or video call
- See the recipient's location—if they're sharing their location with you..
- Click at the top of the Messages window
- Address your message by typing the recipient's name, email address, or phone number.
